

CONFIGURE IMAGEDATAGENERATOR CLASS

Date	14 November 2022
Team ID	PNT2022TMID53466
Project Name	AI-Powered Nutrition Analyzer for Fitness Enthusiasts

Image Data Generator class is instantiated and the configuration for the types of data augmentation

There are five main types of data augmentation techniques for image data; specifically:

Image shifts via the width shift range and height shift range arguments. The image flips via the horizontal flip and vertical flip arguments.

Image rotations via the rotation range argument. Image brightness via the brightness range argument. Image zoom via the zoom range argument.

An instance of the Image Data Generator class can be constructed for train and test.

Arguments for ImageDataGenerator class

```
train_datagen=ImageDataGenerator(rescale=1./255, shear_range=0.2, zoom_range=0.2, horizontal_flip=True)
text_dataset=ImageDataGenerator(rescale=1./255)
```
